FRED 25

Whether you are a fisherman, diver, using a wheelchair or just wants easy access for yourself and your luggage, you will appreciate the easy boarding and space of FRED 25.

Fred 25 is an innovative 7.5 meters aluminium boat with remote controlled bow ramp and flexible interior. For example all seats can be folded away to create maximum space, to ensure a boat that is practical, easy to handle and yet with high comfort. The driver's seat and console can be adjusted for best comfort and the navigation desk is for recessed GPS and/or Sonar.

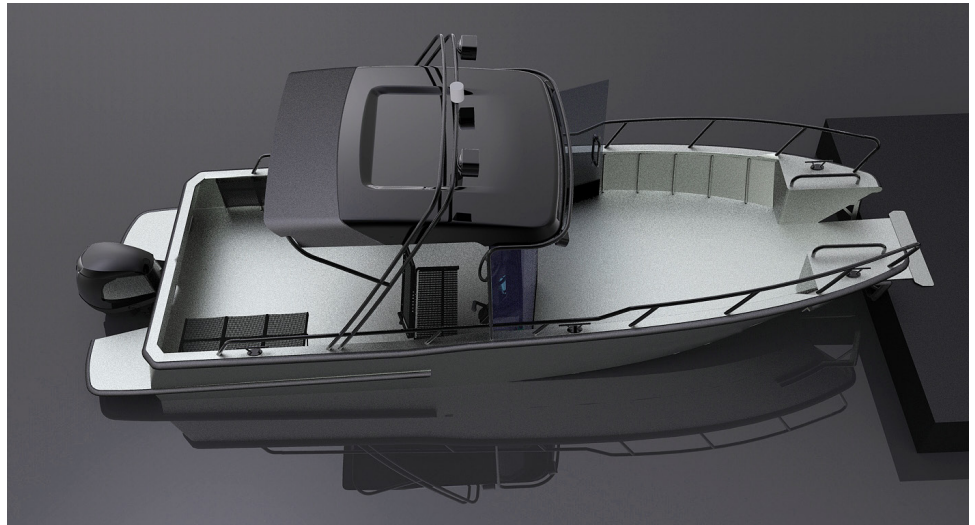

The principle is simple: Fred 25 is designed to be operated and used by everyone, on your own or with a crew. The result is a multi purpose boat that is both safe and fun to drive. The hull is extremely stable and offers a safe and comfortable transport and handling, even in ruff weather.

Fred 25 is crafted by hand and the strong hull together with equipment such as a bow thruster and remote controlled ramp makes this boat into one of a kind. The high quality ensures a boat to enjoy and rely on for many years.

H3

HIGH-END QUALITY

FRED 25 is handcrafted in aluminium for easy maintenance and durability. The design is uncompromising in safety, handling and nautical characteristics.

The boat is built to military standards with classic 20 degree V-hull that ensures security and performance in all speed ranges. Unsinkable three section double bottom hull with collision bulkhead for maximum security. The hull is designed for extreme stiffness and durability in combination with low weight and minimum noise.

ACCESSIBILITY

The 90 cm wide bow ramp makes boarding and loading easy, whether you walk, sit in a wheelchair, carry a load of fishing gear or push a wheelbarrow. The deck is completely flat throughout the boat and provides fantastic space for transport, fishing leisure, easy handling and accessibility.

With its 7.5 meters, Fred 25 has plenty of room for 8 people with equipment on the foredeck.

The driver's position is fully adjustable for best comfort with raisable navigation desk and tiltable steering wheel. The driver's seat is fully adjustable, turnable and can be folded flat to the hull side.

HANDLING

Fred 25 is equipped with bow thruster and ramp with wireless remote control for easy and secure handling. An extra effort has been made to the design for making the boat easy to handle, even for a skipper with reduced physical capacity.

A wide range of options for prolonged season and even easier handling is available, such as remote controlled windlass, radar and a cabin-version of the boat.

FRED 25
Suzuki 175 HP

STANDARD EQUIPMENT

- Remote controlled bow thruster
- Hydraulic steering
- Adjustable steering console
- Adjustable and turnable driver's seat
- Flexible passenger seat
- Remote controlled bow ramp
- Running lights
- Cabin lights
- Flushing Pump and bilge pump
- Bathing and rescue ladder
- Fire extinguisher
- Compass
- Start battery
- Consumption battery
- Anchor and anchor line

FACTS AND FIGURES

Length 7.50m (appr 8,70 m with bathing platform and outboard motor)
Beam 2.57 m (appr 2.7 m with fenders)
Depth 0.4 m with motor down
Fuel tank 300 liters
Motor Suzuki DF 175 hp
